Docket Nos. 50-437
50-438

In your August 21, 1981 letter to H. G. Parris concerning a Class 9 accident analyses, you requested TVA's ". . . assistance in analyzing the consequences of a liquid pathway release from a postulated core melt accident . . ." at the Bellefonte Nuclear Plant. On November 12, 1981 we telephoned R. W. Hernan, Licensing Project Manager, with several questions concerning TVA's participation in the above analyses. In particular, we were interested in receiving more detailed guidance as to what was required of TVA, and we asked for a list of input that TVA could be responsible for preparing. In addition, we requested the titles of published environmental impact statements in which a Class 9 analyses had been performed. To date, these requests are unfulfilled.

We would appreciate receiving the above information so that we will be able to provide you with the appropriate assistance.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
