Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Ms. Adensam:

In the Matter of the Application of) Docket Nos. 50-438
Tennessee Valley Authority) 50-439

In July 1981, the NRC issued a comprehensive revision to the guidelines utilized by NRC staff reviewers in performing safety reviews of plant construction permit/operating license applications (NUREG-0800, "Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants"). The revised Standard Review Plan incorporates a number of the new regulatory requirements for plant designs that have been promulgated after TVA's applications to construct and operate Bellefonte units 1 and 2 were submitted. This letter is to document TVA's understanding from our September 24, 1981 meeting in Bethesda, Maryland, with D. G. Eisenhut, et al, on Watts Bar Nuclear Plant that the Bellefonte operating license application will be reviewed to the previous revision of the Standard Review Plan (November 1975).

TVA recognizes that certain issues related to the Three Mile Island unit 2 accident (NUREG-0737, etc.) are now referenced in the revised SRP and must be satisfactorily addressed before the receipt of an operating license. Our compliance with these TMI-related items will be documented in the course of the Bellefonte OL application licensing review.

If you have any questions concerning this matter, please get in touch with D. L. Terrill at FTS 858-2680.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
