Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of the Application of) Docket No. 50-438
Tennessee Valley Authority) 50-439

This is to inform you of further changes that TVA proposes to make in the Bellefonte Nuclear Plant preoperational radiological monitoring program. Please refer to our March 16, 1983 letter to you about this same subject. In that letter, we discussed interim monitoring to begin on May 1, 1983. This interim plan was to lead into the full preoperational program one year before unit 1 fuel load.

TVA believes that it would be more resource effective to suspend our preoperational radiological monitoring activities at present and to resume these activities with the full program one year before unit 1 fuel load. TVA has been collecting preoperational data at Bellefonte since 1978, and enough data is available to meet program requirements with the exception of the specific information to be gathered within the last year before plant operation. The reimplemented program will reflect appropriate changes in regulatory requirements or monitoring philosophy and, if required, portions of the monitoring program will be implemented earlier than the full program.

If you have any questions concerning this matter, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
