Dear Ms. Adensam:

In the Matter of the Application of) Docket No. 50-438
Tennessee Valley Authority) 50-439

By letters dated May 21, 1979 and November 25, 1981, TVA requested NRC approval for use of flexible metal hose at our nuclear plants. Included in those letters was data demonstrating compliance with Regulatory Guide 1.84 and ASME Code applications addressed in Code Case N-192. Also included were tables identifying and establishing locations of the flexible hose.

Enclosed are seven copies of additional documentation demonstrating compliance with Code Case N-192 for use of flexible metal instrumentation hose assemblies at Bellefonte. Pursuant to section 50.55a(a)(2)(ii) of 10 CFR Part 50, the enclosed is provided for your review.

Since Code Case N-192 has been approved, TVA is proceeding with the aforementioned uses of the specified flexible metal hoses. NRC exception to this action should be provided by June 15, 1983.

If you have any questions concerning this matter, please get in touch with Bill Watters at FTS 858-2691.

Very truly yours,
