

3/23/11

TRIP REPORT

LICENSEE: Analytical Bio-Chemistry Laboratories, Inc.
Docket No.: 030-05154
License No.: 24-13365-01

PARTICIPANTS: Analytical Bio-Chemistry Laboratories, Inc.
Bradly Keck, Radiation Safety Officer
Troy DeVault, Vice President of Corporate Services
Scott Ward, Senior Vice-President and General Manager

Nuclear Regulatory Commission
Katie Streit, Health Physicist Inspector

Katie Streit, 3/23/11

DATE OF VISIT: March 10, 2011

SUBJECT: DISCUSSIONS REGARDING ANALYTICAL BIO-CHEMISTRY
LABORATORIES ALTERNATIVE WASTE DISPOSAL REQUEST
DATED FEBRUARY 16, 2011

On the above date, Analytical Bio-Chemistry Laboratories (ABC) and the NRC discussed ABC's request via letter dated February 16, 2011 (ML110550121) for alternative disposal request per 10 CFR 20.2002. The NRC informed ABC that a specific location of disposal is needed for the NRC to begin a technical review of the request. ABC informed NRC that it has a proposed location for alternative disposal and will submit a new request with that location. Therefore the NRC is voiding the request via letter dated February 16, 2011.

ABC stated that the current plan of disposal of waste generated during remediation of the sanitary lagoon is through the proposed alternative disposal pathway. Since the decommissioning plan for the sanitary lagoon is currently under NRC review, the NRC informed ABC that a new 10 CFR 20.2002 request and the proposed decommissioning plan will be reviewed together (Mail Control Number 574474).
