Dear Mr. Lawyer,

In a telephone conversation on March 15, 2011 you requested clarification of planned future use of the Building 1103A, Aberdeen Proving Ground (APG), Maryland, facility. This clarification is needed in support of the Environmental Assessment (EA) for the unrestricted release of the facility.

The Army Research Laboratory has no plans at present to use the facility for any operations that will cause the facility to become contaminated with radioactive material. Future uses of the facility will be limited to operations that will not cause the facility to become contaminated.

If you have any questions, please contact Richard A. Markland (410)278-6354, [markland@arl.army.mil](mailto:markland@arl.army.mil).

Sincerely,

  
Pamela E. Fry  
Experimentation Support Manager
