Southern Nuclear Operating Company
Vogtle Electric Generating Plant Units 3 and 4
Nuclear Development Executive Management Addition

Ladies and Gentlemen:

Southern Nuclear Operating Company (SNC) is pleased to announce an executive management addition to the Vogtle Electric Generating Plant (VEGP) Units 3 and 4 Project team. Mr. J. R. "Randy" Johnson has been named Vice President of Quality and Compliance for VEGP Units 3 and 4. He will be responsible for:

- Quality Assurance, which includes both internal and contractor compliance
- Technical Quality, inclusive of major components and module assembly
- Site support functions (Licensing, Performance Improvement, Security, Fitness-For-Duty Program, VEGP Units 1 and 2 Interface, Emergency Preparedness)

Mr. Johnson reports directly to the Executive Vice President of Nuclear Development due to his quality assurance functions, but is also matrixed to the Site Vice President, VEGP Units 3 and 4 due to his day-to-day involvement in vendor oversight and other site support activities. Mr. Johnson assumed this new executive management position on February 5, 2011.

This new executive management position affects organization descriptions provided in the VEGP Units 3 and 4 Final Safety Analysis Report (FSAR) contained in the Combined License (COL) application and the Nuclear Development Quality Assurance Manual (NDQAM). Since the COL application has effectively been "frozen" in accordance with provisions in Interim Staff Guidance 11, changes to the affected FSAR organization descriptions will be incorporated in a future FSAR update that will follow issuance of the COLs. The changes to the active NDQAM will be processed in accordance with 10 CFR 50.55(f) in support of the VEGP Early Site Permit and Limited Work Authorization program. Changes to the NDQAM associated with the COLA will be made in accordance with 10 CFR 50.55(f) following issuance of the COLs.
