FeeCategory: NewsMedia

MediaType: The Mainichi Newspapers

MediaType_Newspaper: on

FeeCategory_Description:

Expedite_ImminentThreatText:

Expedite_UrgencyToInform: on

Expedite_UrgencyToInformText: Many people in Japan obtain information about the nuclear disaster in Fukushima from both Japanese media and American media. Information that American media provides (Often those information come from NRC.) tends to give people a sense of urgency more than the Japanese media provides (most of their information comes from the Japanese government). Many Japanese people are confused how much they are in danger and how much more they have to worry about the ongoing nuclear crisis.

We would like to introduce the public the actual exchange of emails and other information that can explain how the US and Japanese governments have exchanged information and what level the Japanese people should concern their safety. We believe those information will greatly help many Japanese people have a clearer and balanced understanding of the ongoing crisis. We believe those information should be provided as soon as possible so that they can decide what they have to do in order to tackle the ongoing nuclear disaster without delay.
