RE: License # 13-26510-01 and Docket # 030-33227

Dear Ms. Casey:

This letter is in response to your letter dated February 21, 2011 regarding removal of our former location of use at 207 Sparks Avenue, Jeffersonville, Indiana from our license. As stated in your letter, you needed additional information to complete this request.

1. Request to specify the radionuclide used as a standard to determine the efficiency, its activity, and its count in units that will permit correlation with the results:

Standard: CO57 rod source  
Activity:  $2.33 \times 10^5$  DPM on 3-1-10  
Count in units: DPM = 127,200  
CPM = 92,101  
Bkg =  $173 \pm 61$  CPM

2. Request for the appropriate efficiency and/or correction factor for the wipe test results so you can determine whether residual contamination was present:

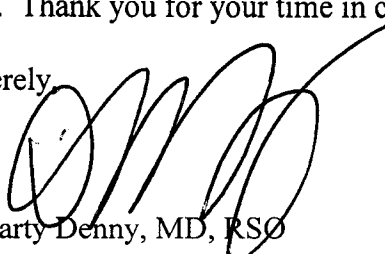

Efficiency: 0.735 CPM/DPM

3. Request to specify what the action levels were for the wipe test results:

2000 DPM per 100 cm<sup>2</sup>

If you need additional information, please contact Janice Oakley, CNMT at 812-282-1617. Thank you for your time in completing this request.

Sincerely,

  
D. Marty Denny, MD, RSO
