Subject: ESTABLISHING MAXMIMUM POSSESSION LIMITS FOR NRC LICENSE

License No. 11-27359-01
Docket No. 030-32300

Dear Mr. Snyder:

Your Nuclear Regulatory Commission (NRC) license currently has "open ended" possession limits for the radionuclides that you possess. The NRC no longer writes its licenses in this manner. Please provide the amount per source and the total amount you wish to possess for each radionuclide listed on your license. You may wish to request a possession limit adequate to allow for the possession of a spare source(s) during replacement of the source in a device(s), to accommodate the future purchase of additional sources, and/or any sources and/or devices you may have in storage and not currently using.

The table below shows all the sources you are allowed to possess on your current license. Please insert the manufacturer and model number for your current inventory. Also, please insert the amount per source and the total amount you wish to possess for each radionuclide listed on the license (A and B):

Radionuclide	Manufacturer and Model Number	Amount per source	Maximum Possession Limit
A. Cesium-137	A.	A.	A.
B. Americium-241	B.	B.	B.

Please respond to this e-mail by March 18, 2011. If you are unable to respond by this due date, please don't hesitate to contact me and we can discuss an extension to the date. You may respond by e-mail in PDF format. If you have any questions regarding this e-mail, please call me at 817-276-6596.
