Subject: ESTABLISHING MAXMIMUM POSSESSION LIMITS FOR NRC LICENSE

License No. 03-17243-01
Docket No. 030-12413

Dear Ms. Statler:

Your Nuclear Regulatory Commission (NRC) license currently has "open ended" possession limits for the radionuclides that you possess. The NRC no longer writes its licenses in this manner. Please provide the amount per source and the total amount you wish to possess for each radionuclide listed on your license. You may wish to request a possession limit adequate to allow for the possession of a spare source(s) during replacement of the source in a device(s), to accommodate the future purchase of additional sources, and/or any sources and/or devices you may have in storage and not currently using.

The table below shows all the sources you are allowed to possess on your current license. Please verify the manufacturer and model number reflects your current inventory. Also, please insert the amount per source and the total amount you wish to possess for each radionuclide listed on the license (A thru D):

Radionuclide	Manufacturer and Model Number	Amount per source	Maximum Possession Limit
A. Cesium-137	A. AEA Technology/QSA, Inc., Model No. CDCW556; Isotope Product Laboratories Model No. HEG-137	A.	A.
B. Americium-241	B. AEA Technology/QSA, Inc., Model No. AMNV.997; Isotope Product Laboratories Model Nos. Am1.NO2, 3021 or 3027	B.	B.
C. Cesium-137	C. CPN International, Inc., Model CPN-131	C.	C.
D. Americium - 241	D. CPN International, Inc., Model CPN-131	D.	D.

Ms. Statler:

You have the CPN International, Inc. Model CPN-131 currently on your license. However, you do not mention it on the table provided to establish maximum possession limits. Unless instructed otherwise, I will remove the CPN International, Inc. from your license and I will add the Troxler 3241-C provided in the table.

Thanks,

Lizette Roldán-Otero, Ph.D.
