Clinton J. Martinez
Radiation Safety Officer
Wolverine Engineers & Surveyors, Inc.
312 North Street
Mason, MI 48854

Dear Mr. Martinez:

Enclosed is Amendment No. 02 to your NRC Material License No. 21-25970-02 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note that we deleted Condition No. 13 as it appeared on Amendment No. 01 of your NRC Material License. This condition is now considered redundant since your license contains possession limits. This also required us to renumber subsequent conditions.

We also updated Condition Nos. 14. D and 17 as they appear on this current amendment enclosed. These changes should enhance your awareness of the radiation safety program elements in your license and our regulatory requirements.

In accordance with 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

C. Martinez

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael G. Herr". The signature is stylized with large, sweeping letters and a long horizontal stroke at the end.

Michael G. Herr, CHP
Materials Licensing Branch
