J. Wayne Leonard
Energy Corporation

Your ad. in today's Times refers to "the strongest earthquake anticipated in the area".

Japan never expected a 9.0. But there it was, with much devastation.

Atomic energy is expensive and of dubious safety. It is an expensive way to boil water.

Worst of all, the radioactive waste that endures for thousands of years. Is this the legacy we want to leave our posterity?

Go for wind, solar, natural gas, hydrogen. There have none of the hazards of the atom.
