Materials License No. SNM-2511, Docket No. 72-26  
Diablo Canyon Independent Spent Fuel Storage Installation  
Annual Radioactive Effluent Release Report for 2010

Dear Commissioners and Staff:

Pursuant to 10 CFR 72.4 and 10 CFR 72.44(d), this letter provides the report of the quantity of radionuclides released to the environment in liquid and gaseous effluents due to the operation of the Diablo Canyon Power Plant (DCPP) Independent Spent Fuel Storage Installation (ISFSI). As documented in the DCPP ISFSI Final Safety Analysis Report, the DCPP ISFSI multi-purpose canisters (MPCs) are designed and constructed to ensure no release of radioactive gas, liquids, or solid waste effluents.

For the year 2010, there were no releases of liquid or gaseous radionuclides to the environment from the operation of the DCPP ISFSI.

If you have any questions regarding this submittal, please contact Mr. John Knemeyer at (805) 545-4472

Sincerely,

  
James R. Becker
