Re: Mariusz Paluch's Training

44-13760-01
03003294

As we discussed a few weeks ago, we do not have Mo/Tc generators on site at our facility since all of our materials are now provided as unit doses. We therefore have used our suppliers to do demonstrations of generator milking and quality control.

I have verified the following training for Dr. Paluch with the physicist in charge of our resident training:

Dr. Paluch participated in a one hour demonstration of generator elution. In addition to a discussion of the process of performing the procedure, covered topics included radiation safety, the decay scheme of Mo/Tc99m/Tc99, molybdenum breakthrough and the testing required to assure that regulatory standards are met.

Please contact me if any further information is required.
