Dear Sir,

I am writing a request that re-licensing of South Texas Project Reactors 1 & 2 be halted for the following safety concerns regarding:

South Texas Project Units 1 & 2 Relicensing

NR C-2010-0375 DOCKET NOS. 50-498;

- the risks of an accident, fire or explosion 50-499 at one or more reactors at site could increase with using
- these reactors consume vast quantities of water use largely from the Colorado river, water that is needed for drinking water.

Thanks for your consideration,

Tarek Tousson
