Subject: License extension for South Texas Project 1 & 2

1/31/2011
46FR5410

I am opposed to the license extensions for Units 1 & 2 at the South Texas Project.

In light of the events in Japan in the last month, the NRC should delay any license extensions until the events that led to the problems at Fukushima Daiichi can be fully examined, and the Commission can determine that the South Texas reactors could not suffer the same kind of loss-of-power accident. The Commission should also study the spent fuel pools at South Texas to make sure that they have guaranteed back-up power in the event of a natural or man-made disaster.

In addition, the existing South Texas units need to be evaluated to see if they will need to be modified to meet the newly proposed cooling water requirements that the Environmental Protection Agency announced this week.
