Thanks, the concern at Oyster is they are about to go past the 40 year license without a renewal. Timely filed period of operation. Local want a shutdown. So filing exemptions is probably news that they cannot use.

We now have two Oyster exemptions, one for previously approved manual actions and one for new manual actions. These have been accepted as part of the acceptance review process for review.

In they are in ADAMS and will be publicly released in a few days, ML090630132 and ML090640225.

With major activities like NFPA 805 and enforcement discretion issues, a single fire exemption doesn't seem to meet Commission communication/communication plan threshold. But as I'm learning there are four things that the commission is interested in.

Anything Indian Point
Harris Fire Stuff
Browns Ferry Fire Stuff

And now I know - VY fire stuff.

It seems to be more a plant sensitivity than related to the fact that we issued an exemption.

Thanks, yes the submittal was a big to do so we knew the issue. Briefings with stakeholders and such. The approval would have been a nice to know. We might have had to do a comm plan again.

Do you always highlight the Comm on exemptions? Did Peach Bottom and TMI get this type announcement. Oddly this was the only one that tumbled down.

So, the Wiggins email to Sam was quickly relayed downward. So I did hear about it.

See the NRR note on the VY fire protection exemption....17' 7.5" vs 20' separation.

Presume we told your guys.
