ANP-10315P, "U.S. EPR Protection System Surveillance Testing and TELEPERM XS Self-Monitoring Technical Report"

Proposed changes to the instrumentation and controls (I&C) architecture were communicated to the NRC staff in the February 15, 2011 public meeting. The U.S. EPR Protection System Surveillance Testing and TELEPERM XS Self-Monitoring Technical Report has been developed to incorporate the revised I&C architecture. The new report "U.S. EPR Protection System Surveillance Testing and TELEPERM XS Self-Monitoring Technical Report" (ANP-10315P), is enclosed with this letter.

AREVA NP has incorporated this report by reference in the U.S. EPR Final Safety Analysis Report (FSAR). The conforming changes to U.S. EPR FSAR will be transmitted to the NRC consistent with the schedule communicated in the February 15, 2011 public meeting. AREVA NP requests that the NRC incorporate the review of this report into the evaluation of the instrumentation and controls design in the safety evaluation report for the U.S. EPR FSAR in a manner consistent with other reports which are incorporated by reference in the U.S. EPR FSAR.

AREVA NP considers some of the material contained in the enclosures to be proprietary. As required by 10 CFR 2.390(b), an affidavit is enclosed to support the withholding of the information from public disclosure. Proprietary and non-proprietary versions of the attachments are provided on the enclosed CDs.
