Follow-Up Questions

SUMMARY

Regarding the inspection of Covance Clinical Research Unit in Honolulu, HI:

1. What date(s) did the licensee possess licensed material at the Honolulu, HI facility from January 2007 until it received licensed material there in 2010?

Answer: The licensee possessed no licensed material at the Honolulu, HI facility from January 2007 until it received licensed material there in 2010. Based on Michelle's discussion with licensee staff and her review of selected area survey records, there was no indication that the Honolulu, HI facility had residual contamination such that it wasn't releasable for unrestricted use.

2. What types and quantities of licensed material did the licensee possess at the Honolulu, HI facility during the dates indicated in your response to Question 1?

Answer: The licensee possessed no licensed material at the Honolulu, HI facility from January 2007 until it received licensed material there in 2010.

3. Did the licensee dispose of any licensed material between January 2007 and when it received licensed material at the facility in 2010?

Answer: Michelle didn't know when the licensee shipped radioactive waste generated from the study conducted in January 2007.

4. Did the licensee conduct principal activities at its Evansville, IN facility? If not, when did the licensee stop conducting principal activities at its Evansville, IN facility?

Answer: The licensee said it hadn't conducted principal activities at its Evansville, IN facility; however, the licensee didn't state when it stopped conducting principal activities there.

ACTION REQUIRED

Place in ADAMS.
