	U.S. NUCLEAR REGULAT	ORY COMMISSION		Amendment No. 03			
MATERIALS LICENSE Corrected Copy							
Pursuant to the Atomic Energy Act of 1954 Federal Regulations, Chapter I, Parts 30 heretofore made by the licensee, a license source, and special nuclear material desi deliver or transfer such material to persons shall be deemed to contain the conditions applicable rules, regulations, and orders of below.	A, as amended, the Energy F (a), 31, 32, 33, 34, 35, 36, 3 (b), 31, 32, 33, 34, 35, 36, 3 (c), 32, 33, 34, 35, 36, 3 (c), 34, 35, 35, 35, 35, 35, 35, 35, 35, 35, 35	Reorganization Act of 1974 19, 40, and 70, and in rel ng the licensee to receive, material for the purpose(s accordance with the regula of the Atomic Energy Act o ommission now or hereaft	I (Public Law 93-4 iance on stateme acquire, possess and at the place tions of the applic of 1954, as amer er in effect and to	438), and Title 10, Code of ents and representations s, and transfer byproduct, e(s) designated below; to cable Part(s). This license ided, and is subject to all o any conditions specified			
Licensee	In accordance with letter dated						
		March 9, 2004,					
1. Hastings Testing Engineers and	 Hastings Testing Engineers and Environmental 		3. License number 21-26296-01 is amended in its entirety to read as follows:				
2. 4376 Barchester	4. Expiration date July 31, 2011						
Bloomfield Hills, MI 48302	Bloomfield Hills, MI 48302						
 Byproduct, source, and/or special nuclear material 	rount that licensee may iny one time under this						
A. Cesium-137	A. Sealed sou drawing N	urces (Troxler o. 102112)	A. 5 source millicuri	es not to exceed 9 es each			
B. Americium-241	B. Sealed sou drawing N	urces Troxler o. 102451)	B. 5 source millicuri	es not to exceed 44 es each			
9. Authorized Use:							
A. and B. To be used in Troxler Model 3400 series gauging devices for measuring the properties of materials.							
·		<u>FIONS</u>	<u> </u>				
10. Licensed material may be stored at 4841 Golf Club Lane, Howell, Michigan and may be used at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material.							
11. A. The Radiation Safety Officer (RSO) for this license is Robert Hastings .							
 B. Before assuming the duti successfully completed o NUREG-1556, Volume 1, 	es and responsibilities ne of the training cours dated May 1997.	as RSO for this licen ses described in Crite	se, future RS0 ria in Section	Ds shall have 8.8 of			
12. Licensed material shall only be individuals who have received	e used by, or under the the training described	e supervision and in th in application receive	ne physical pre ed May 7, 200	esence of, 1.			
13. A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by NRC under 10 CFR 32.210 or by an Agreement State.

	B.	In the absence of a certificate from a transferor indica intervals specified in the certificate of registration issu Agreement State prior to the transfer, a sealed source into use until tested.	ting that a leak test has been made within the ed by NRC under 10 CFR 32.210 or by an received from another person shall not be put				
	C. Sealed sources need not be tested if they are in storage and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.						
	D.	The leak test shall be capable of detecting the present the test sample. If the test reveals the presence of 0.0 contamination, a report shall be filed with the U.S. Nu with 10 CFR $30.50(c)(2)$, and the source shall be rem decontaminated, repaired, or disposed of in accordant	ce of 0.005 microcurie of radioactive material on 005 microcurie or more of removable iclear Regulatory Commission in accordance oved immediately from service and ce with Commission regulations.				
	E.	Tests for leakage and/or contamination shall be perform Commission or an Agreement State to perform such s to collect leak test samples but not perform the analys by persons specifically licensed by the Commission or	rmed by persons specifically licensed by the services. In addition, the licensee is authorized sis: analysis of leak samples must be performed r an Agreement State to perform such services.				
14.	 Sealed sources or source rods containing licensed material shall not be opened or sources removed or detached from source rods or gauges by the licensee, except as specifically authorized. 						
15.	The rece the	licensee shall conduct a physical inventory every 6 mc sived and possessed under the license. Records of inv date of each inventory.	inths to account for all sources and/or devices rentories shall be maintained for 2 years from				
16.	The "Pac	licensee may transport licensed material in accordance ckaging and Transportation of Radioactive Material."	e with the provisions of 10 CFR Part 71,				
17.	Any cleaning, maintenance or repair of the gauge(s) that requires removal of the source rod shall be performed only by the manufacturer or by other persons specifically licensed by the Commission or an Agreement State to perform such services.						
18.	Exce from wou issu	spt for maintaining labeling as required by 10 CFR Part NRC before making any changes in the sealed source Id alter the description or specifications as indicated in ed either by the Commission pursuant to 10 CFR 32.2	20 or 71, the licensee shall obtain authorization a, device, or source-device combination that the respective Certificates of Registration 10 or by an Agreement State.				
19.	In ac mate decc	Idition to the possession limits in Item 8, the licensee s erial to quantities below the minimum limit specified in formation commissioning financial assurance.	hall further restrict the possession of licensed I0 CFR 30.35(d) for establishing

- 20. Each portable gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container must be locked when in transport, storage, or when not under the direct surveillance of an authorized user.
- 21. A. If the licensee uses unshielded sealed sources extended more than 3 feet below the surface, the licensee shall use surface casing that extends from the lowest depth to 12 inches above the surface and other appropriate procedures to reduce the probability of the source or probe becoming lodged below the surface. If it is not feasible to extend the casing 12 inches above the surface, the licensee shall implement procedures to ensure that the cased hole is free of obstruction before making measurements.
 - B. If a sealed source or a probe containing sealed sources becomes lodged below the surface and it becomes apparent that efforts to recover the sealed source or probe may not be successful, the licensee shall notify the U. S. Nuclear Regulatory Commission and submit the report required by 10 CFR 30.50(b)(2) and (c). The licensee shall not abandon the sealed source or probe without obtaining the Commission's prior written consent.
- 22. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.

A. Application received May 7, 2001.
