Subject: Commitment for post-treatment record of Y-90 microsphere administrations

This record represents a series of communications with Marleen on this date regarding FAHC's commitment for post-treatment records of Y-90 microsphere administrations.

The last sentence of item 3.d. of FAHC's March 28 response letter reads: "The record will include the name of the individual who made the assessment for termination, if applicable, the date and the signature of the AU....."

I explained to Marleen my understanding that the current NRC guidance acknowledges two scenarios:

- a) If not terminated due to stasis, any individual (not necessarily an AU) may make the assessment of dose/activity to primary treatment site and other sites. The record should be prepared within 24 hours include the name of the individual who made the assessment and the date.
- b) If terminated due to stasis, the record needs to include the above, plus the signature of an AU.

I asked Marleen to consider making a minor revision to FAHC's sentence above to address both scenarios acknowledged in the current NRC guidance.

Marleen asked to substitute the following language for the last sentence of item 3.d.: "The record will include the name of the individual who made the assessment, the date, and, if terminated due to stasis, the signature of the AU."

**Action Required:** Issue amendment, addressing substitute language in cover letter
