NRC FORM 591M PART 1 U.S NUCLEAR REGULATORY COMMISSION (06-2010)10 CFR 2.201 SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION 1. LICENSEE/LOCATION INSPECTED: 2. NRC/REGIONAL OFFICE U.S. Nuclear Regulatory Commission Union Associated Physicians Clinic, LLC 221 South 6th Street Region III 2443 Warrenville Road, Suite 210 Terre Haute. IN 47807-42146 Lisle, Illinois 60532-4351 REPORT NUMBER(S) 2011-01 3. DOCKET NUMBER(S) 4. LICENSEE NUMBER(S) 5. DATE(S) OF INSPECTION 030-34580 13-32039-01 March 24 LICENSEE: The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows: 1. Based on the inspection findings, no violations were identified. 2. Previous violation(s) closed. 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied Non-cited violation(s) were discussed involving the following requirement(s): 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE						
The licensee is a medical clinic located in Terre Haute, Indiana, authorized by the license to use any byproduct material as needed permitted by 10 CFR 35.100 and 35.200. Licensed activities were conducted only at the location indicated on the license.						
The nuclear medicine department was staffed with three nuclear medicine technologists (NMTs). The NMTs averaged 10 cardiac rest and stress diagnostic scans each weekday using myoview unit doses obtained from a Terre Haute nuclear pharmacy. All waste was either held for decay-in-storage (DIS) and unused doses returned to the nuclear pharmacy. No change in RSO or Chief NMT since the previous inspection. The inspector performed independent and confirmatory radiation measurements which indicated results consistent with licensee survey records and postings.						
Performance Observations						
Interviews with licensee personnel indicated adequate knowledge of radiation safety concepts and procedures. The licensee's NMTs (Kristi Howe, Eric Hopler) demonstrated/discussed: (1) survey meter use and calibrations; (2) package check-in procedures; (3) unit dose prep; (4) wipe test counting; (5) dosimetry (2009: 320mr DDE, 1310mr finger; 2010: 366mr DDE, 1090 finger); (6) waste handling; (7) sealed source inventories; (8) security of licensed material; (9) dose calibrator tests; (10) radiation safety program audits; and (11) one minor contamination event on 10/21/10, involving a drop of myoview on a treadmill. Contamination Surveys and cleanup well documented.
