Dear Mr. Denton:

In the Matter of the Application of) Docket Nos. 50-438
Tennessee Valley Authority) 50-439

Submitted herewith for your review are 60 copies of Amendment 25 to the application for an operating license for the Bellefonte Nuclear Plant units 1 and 2. An instruction sheet for incorporating the revised material into the Final Safety Analysis Report (FSAR) is included with each amendment.

Included in this amendment are:

1. Revisions to Table 3.11.3-1 to provide a summary of the results of environmental qualification testing;
2. Revisions to Section 6.2.1.4.1 to provide a more realistic analysis for a steam line break inside containment;
3. Our response or schedule for responding to all round one questions; and
4. Miscellaneous text changes to the FSAR.

Because of our policy to incorporate responses to Bellefonte FSAR questions into FSAR text, responses to all FSAR questions will not be complete until the referenced text has also been amended. Based on our present schedule for updating the FSAR text, this will not be completed until December 1986.

If you have any questions concerning this matter, please get in touch with D. L. Terrill at FTS 858-2682.

Very truly yours,
