

Docket Nos. 50-438
and 50-439

MAR 22 1977

Mr. J. E. Gilleland
Assistant Manager of Power
Tennessee Valley Authority
831 Power Building
Chattanooga, Tennessee 37401

Dear Mr. Gilleland:

The Nuclear Regulatory Commission's (NRC) staff has reviewed the document titled "Report of Transmission Line Right of Way Clearing and Maintenance Methods" dated January 1977 which was submitted to the NRC staff in response to Condition 3.D.(3) of Construction Permits Nos. CPPR-122 and CPPR-123 for the Bellefonte Nuclear Plant. Our analysis finds that this document fulfills the requirements set forth in Condition 3.D.(3) of the construction permit in that it includes an analysis of alternative methods of transmission line construction and maintenance and identifies the cost factors and environmental impacts of each of these alternative methods.

Sincerely,

Original signed by W. H. Regan, Jr.

Wm. H. Regan, Jr., Chief
Environmental Projects Branch 2
Division of Site Safety and
Environmental Analysis
