Subject: 2011-04-07 Woodlan, Agenda and Discussion point for Call on Comanche Peak COL Section 2.4 Open Items

Thank you Steve. The list of open issues is very useful in helping us ensure that we have the proper subject matter experts available on the phone call and at the audit.

Have you identified a day and time for an initial conference call? As I noted previously, we may want to have more than one phone call prior to the audit to ensure that we understand the concerns and come to the audit properly prepared to resolve the open issues. One of our challenges at this point is understanding the specific documents of concern and the specific aspects of the CPNPP application that need the discussion. The list provided is fairly general. We want to be sure we have the proper RAIs, RAI responses, calculations, etc. available. If you have that information now, please provide it. It will help us to prepare for the clarifying conference calls. If not available now, please provided during the initial conference call. It is important that we understand the specific aspects of our design the NRC reviewers feel do not comply with the regulatory guidance (e.g., SRP) or is non-conservative.

We have considered the best location for the audit and would like to propose the MNES offices in Irving, Texas. This is the best place for us to gather the subject matter experts and the documentation, the airport is near and, if necessary, we can go down to CPNPP to confirm specific concerns related to the site. We can discuss this further during or after the conference calls.

Donald R. Woodlan

Manager, Nuclear Regulatory Affairs

Don/John,

The attachment is the list of Section 2.4 open items we plan to discuss during the conference call we have scheduled for sometime next week.

Thanks,

Stephen Monarque
