Kevin,

Each of the events have been listed as closed. However, each of them is still listed as incomplete. The two 04 NMED Events (040766 and 040817) are listed as "Complete = R" (Information Request Pending). As soon as you can fill those Information Requests (RAIs), I will include that information into the NMED records and list them as complete.

The three 05 NMED Events (050069, 050116, and 050121) are listed as "Complete = N" (Not Complete). As soon as you receive inspection reports or additional information on these three events, please send it to me so I can capture it in the records. I will shortly be sending out Information Requests on these also.

Again, each of these is listed as closed, but not complete.

Sincerely,
Dante Huntsman
NMED Project
