Dear LTC Burlingame:

This refers to your license amendment request dated January 25, 2011. Enclosed with this letter is the amended license removing Hydrogen-3, Carbon-14, and Gadolinium-153 from the license. This license also adds Dr. Andrew Frederick Nelson as an authorized user and removes Dr. Nicolaos Tsolomitis Lomis.

Please note that we have removed the license conditions requiring the leak test and inventory of sealed sources not associated with 10 CFR Part 35 use. The sources currently listed on your license are medical sources and these tests are covered under the regulations of 10 CFR Part 35.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**.
