Thomas Murley
Director, Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Murley:

I have heard reports that the Quadrex Corporation may attempt to lease, complete construction, and operate the Bellefonte nuclear power complex.

I believe Quadrex is financially and technically unqualified to construct and operate a nuclear power plant. Their operation of this plant would endanger the health and safety of the residents of Alabama, Georgia and Tennessee. Moreover, the people of this area would receive none of the benefits of the plant's operation, as its power would be sold in bulk elsewhere. I believe these facts would become clear in license transfer hearings, and I wish to notify you that I would request that the state of Georgia enter such hearings on my and the citizens of Georgia's behalf.

Should approval of a transfer of the license for Bellefonte somehow be given to Quadrex, operating license hearings would quite clearly be required. Again, I wish to notify you that I would request that the state of Georgia enter such hearings.

I recognize that a notice of the opportunity for intervention has not yet been issued; and this is not a formal petition to intervene. However, I thought you should know in advance of my intentions. I intervened in the Plant Vogtle operating license hearings and feel confident with the resources of the state of Georgia now available to help with the legal process that I would be successful in showing Quadrex is unqualified.

Sincerely,

A handwritten signature in cursive script that reads "Doug Teper".
