Gentlemen:

In the Matter of) Docket Nos. 50-438
Tennessee Valley Authority) 50-439

**BELLEFONTE NUCLEAR PLANT (BLN) - WITHDRAWAL OF COMMITMENTS -
BULLETIN 85-03 - MOTOR-OPERATED VALVE (MOV) COMMON MODE
FAILURES DURING PLANT TRANSIENTS DUE TO IMPROPER SWITCH
SETTINGS**

During review and planning activities associated with TVA's ongoing preparation for the potential reactivation of construction at BLN, commitments derived from previous TVA responses regarding Bulletin 85-03 have been identified which are no longer necessary as a result of NRC's issuance of GL 89-10. GL 89-10 states that it supersedes the recommendations in Bulletin 85-03 and its supplement. Should TVA resume construction activities at BLN, a response to GL 89-10 will be submitted in a timeframe consistent with the completion schedule for BLN.

TVA's purpose in submitting this correspondence at this time is to provide notification that commitments resulting from previous responses to Bulletin 85-03 are hereby withdrawn. The recommendations in the GL embody the issues encompassed within the previous commitment statements. Withdrawal of these commitments eliminates the necessity to formally track, close, and retain documentation associated with the previous specific line item commitments.
