U.S. Nuclear Regulatory Commission  
Region III  
Materials Licensing Branch  
2443 Warrenville Road, Suite 210  
Lisle, IL 60532-4352

Via Fax: 630-515-1078

Re: NRC License No. 24-00128-03

Dear Reader:

We hereby request amendment of our license to release, for unrestricted use, our former brachytherapy storage room located at 1701 Lacey Street. This room is no longer used for storage or use of radioactive material.

**We request that this application be processed without unnecessary delay.** The former radiation therapy department in which this room is located has been vacated and is slated for demolition and renovation. We would appreciate anything you can do to avoid unnecessary delay of the renovation project by this regulatory process.

Attached is a historical review of licensed material possessed in this room. On April 15, 2011, the strontium-90 eye applicator was relocated to our west campus facility at 817 South Mt. Auburn Road, and the entire inventory of cesium-137 brachytherapy sources was transferred to R. M. Wester and Associates, Inc., at 215 Indacom, St. Peters, Missouri.

Also attached are:

- Decommissioning Report and Closeout Survey
- Floor plan diagram showing location of the former Brachytherapy Storage room.
- Copies of the most recent leak results of sources that were stored in this room.

If you have any questions regarding this matter, please feel free to contact our Radiation Safety Officer, Sam Hancock, Ph.D., at 573-519-4710 (office) or 573-270-7492 (mobile).

Sincerely,

A handwritten signature in cursive script that reads "Sam S. Hancock Ph.D.".

Sam S. Hancock, Ph.D.  
Radiation Safety Officer

Enclosures:

1. Decommissioning Report and Closeout Survey
2. Diagrams of "Brachytherapy Storage"
3. Historical Review of Licensed Material
4. Most recent leak test results (29 pages)

Nicholas Schupp, Director, Radiation Therapy

Attachment 1

Decommissioning Report and Closeout Survey  
Brachytherapy Storage  
Southeast Missouri Hospital

Date of survey

April 17, 2011

Person performing survey

Sam S. Hancock, Ph.D.

Location of area being decommissioned

See Attachment: Room labeled "Brachytherapy Storage."

Historical review of licensed material

Attached is a "Historical Review of Licensed Material" possessed in this area, including complete inventory of sealed sources.

Evaluation of removable contamination

Attached are recent leak test reports of all sources recently possessed in this area. No leaking sources have been in this area. No wipe tests were performed for this survey.

Exposure rate survey

Survey instrument:

Model: Accoma 4200 serial number 10138, with thin end window GM probe model 1053

Calibration date: August 3, 2011 by CNMC Co.

Range: X1 (0.2 mR/hr full scale)

Correction factor: 1.00

Background: 0.0 mR/hr

Action level: Above background

Location of measurements:

- Exposure rate measurements at a height of 6 inches were made in a raster pattern across the floor of the room, with a raster spacing of approximately 12 inches.
- Each of nine lead-filled storage-safe drawers.
- Interior of storage safe, drawers removed.
- Work surfaces behind L-block.

Maximum exposure rate: 0.0 mR/hr. No detectable radiation measured.

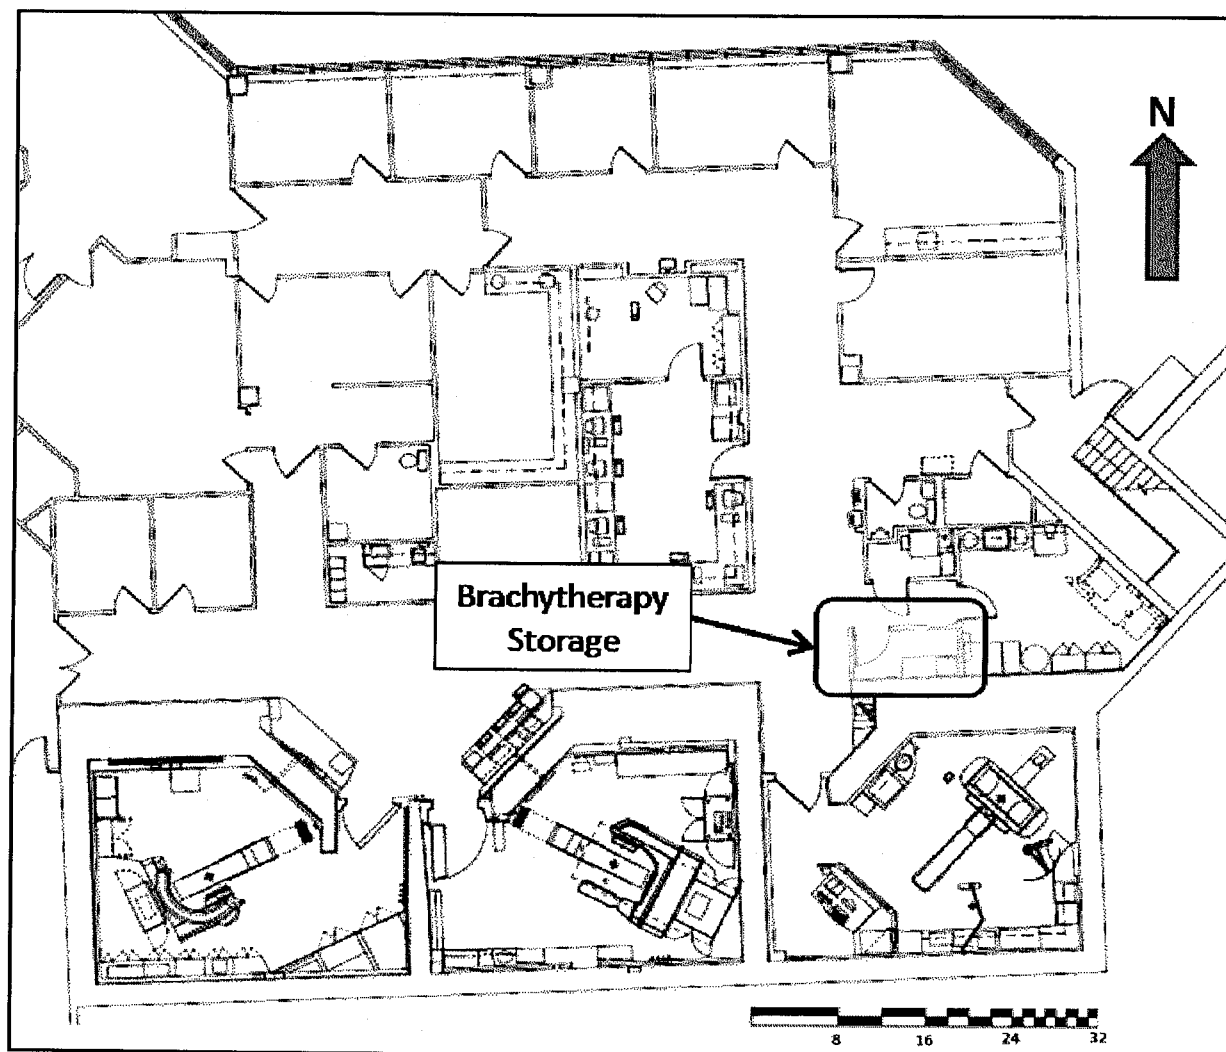

---

Sam S. Hancock, Ph.D.

Brachytherapy Storage

The brachytherapy storage room at 1701 Lacey Street has been used for storage and handling of only sealed sources, including cesium-137 and strontium-90 for therapeutic use. This area has also been used for intermittent short-term storage of I-125 sealed sources that were used for permanent implants. Any unused I-125 sources were routinely transferred to decay-in-storage in the Nuclear Medicine Department hot lab. The permanent inventory of licensed material that has been maintained at this location is listed below. No source leaks have been discovered for any sources possessed in this location.
