RE: Christensen Ranch ISL Operations, Permit No. 478

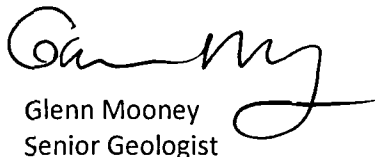

Dear Mr. Arbogast:

This is to acknowledge your letter of April 1, 2011, in which you gave a written report of a spill of barren lixiviant that occurred in March 28, 2011, in Module 2 of Christensen Ranch Mine Unit 7. You reported that about 1000 gallons was spilled of which about 400 gallons reached the bottom of a nearby draw.

I concur in your handling of this matter and recommend that no further action be taken.

Thank you for your response to this matter.

Sincerely,

Glenn Mooney
Senior Geologist
