Houston, Texas 77084

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 42-27706-01

By letter dated April 14, 2011, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated April 14, 2011, stated that all radioactive material had been transferred to your Agreement State licenses (Texas and Louisiana) accordingly.

The supporting documentation to the NRC Form 314 provided a copy of each Agreement State license held by Wood Group Logging Services, Inc. The Agreement State licenses detailed the radioactive material authorizations. You were last inspected on July 22, 2009. No leaking sources and no violations were identified during this inspection. Your license authorized "temporary job sites" only. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been transferred to your Agreement State licenses. Based on these conclusion, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 12 to License No. 42-27706-01, authorizing your license termination. An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(i or ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have questions or require clarification on any of the information stated above, please contact me at 817-276-6590

Sincerely,

/RA/

Michelle Simmons, Health Physicist
Nuclear Materials Safety, Branch B
