STATE CLEARINGHOUSE MEMORANDUM

TO: Mr. Daniel R. Muller, Assistant Director
for Environmental Projects
Directorate of Licensing
United States Atomic Energy Commission
Washington, D.C. 20545

FROM: Charles H. Badger, Administrator *CHB*
Georgia State Clearinghouse
Office of Planning & Budget

DATE: March 29, 1974

SUBJECT: RESULTS OF STATE-LEVEL REVIEW

Applicant: Atomic Energy Commission

Project: Draft Environmental Statement, Bellefonte Nuclear
Plant

State Clearinghouse Control Number: 74-02-06-02

The State-level review of the above-referenced proposal has been completed. This proposal has been found to be consistent with State goals, policies, objectives, plans, programs and fiscal resources.

Additional Comments:

Several questions arose during State agency review concerning safety features of the project. It is felt that those questions may be adequately addressed in the later Final Safety Analysis Report and we would request review and comment privileges to that document. The following questions should be addressed:

- (a) Where will radioactive waste be disposed? How long will these wastes have to be monitored?
- (b) What would be the environmental effects to leakage from the disposal site?
- (c) How would undetected faulty hardware or operator oversight effect risk calculations?
