October 1974

50-438  
50-439

Mr. William H. Regan, Chief  
Environmental Projects Branch No. 4  
Directorate of Licensing  
U.S. Atomic Energy Commission  
Washington, D.C. 20545

Dear Mr. Regan:

There have been several conversations recently between the Regulatory Staff and TVA regarding condition 2b of the Licensing Board's Partial Initial Decision on Environmental Matters and Site Suitability (September 6, 1974) for TVA's proposed Bellefonte Nuclear Plant (Docket Nos. 50-438 and 50-439).

We understand that in view of condition 2b, the Staff feels that additional fishery studies should be undertaken. As a result of discussions to date, TVA has agreed to implement a staff-approved fishery investigation program to obtain the data necessary for assessment of the significance of loss of ichthyoplankton in the proposed intake.

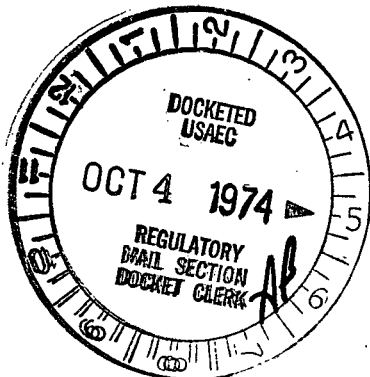

We have also agreed informally that initial discussions of appropriate additional studies would take place in Norris, Tennessee, in TVA's Division of Forestry, Fisheries, and Wildlife Development.

Accordingly, I suggest that appropriate staff personnel meet in Norris on October 23 and 24 or October 30 and 31. I look forward to hearing from you as to which dates are suitable.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

James P. Darling, Chief  
Power Supply Planning Branch
