Docket Nos. 50-438 ✓
and 50-439

Tennessee Valley Authority
 ATTN: Mr. James E. Watson
 Manager of Power
 818 Power Building
 Chattanooga, Tennessee 37401

Gentlemen:

This letter is to confirm the establishment of a revised schedule for completion of the radiological safety review of your construction permit application for the Bellefonte Nuclear Plant, Units 1 and 2. The revised schedule has been discussed with your representatives and is the result of our present assessment that the safety hearing will not be contested.

You were informed of our original review schedule for your application by our letter of July 27, 1973. At that time we anticipated a contested safety hearing which would last about two months with a subsequent prospective decision date on February 8, 1975. Currently, we estimate that the safety hearing will end on October 10, 1974 and the prospective decision date will be November 25, 1974.

Please contact us if you have any questions regarding the revised schedule.

Sincerely,

Original Signed

A. Schwencer, Chief
 Light Water Reactors Br. 2-3
 Directorate of Licensing
