Subject: Clarification to Request for Extension to GNF-A Fundamental Nuclear Material Control Plan (FNMCP) Commitments

References: 1) NRC License SNM-1097, Docket 70-1113
2) GNF-A Fundamental Nuclear Material Control Plan
3) Letter S. P. Murray to NRC Document Control Desk, 3/1/2011

Dear Sir or Madam:

With reference to the previous letter (Reference 3) requesting a onetime receipt measurements extension request to the GNF-A FNMCP requirements, clarification is needed that a license amendment pursuant to 10 CFR 70.34 is not required.

The GNF-A FNMCP adopts the industry standard receipt measurement timeframe pursuant to NUREG/BR-0006 "Instructions for Completing Nuclear Material Transaction Reports". Chapter 7, paragraph 7.1 of the GNF-A FNMCP states:

"A capability will be provided for timely detection of significant discrepancies in LEU shipments received."

Timely used in this context is defined by NUREG/BR-0006 as within 60 days of receipt.

As a result, a onetime extension of this timeframe for an additional 30 days does not require a license amendment as previously requested in the March 1, 2011 letter.

If you have any questions regarding this matter, please contact me at (910) 819-5950.

Sincerely,

Scott Murray, Manager
Licensing & Liabilities
