Subject: Chapter 9 Items

Jim,

A couple of things:

1. Is the original TSC Dose Calculation analysis available in the Westinghouse Reading Room? During our telecom on the draft RAIs the staff requested that the original TSC Dose Calculation and the revised TSC Dose Calculation be made available for their review. This will allow them to perform a comparison so that they can agree on the approach for the revision and expedite their acceptance of the RAI response.
2. You may want to review the RAIs that were asked for the AP1000 DCD fuel rack structural reports. I was informed that they should be public and that they may assist you with understanding the consistency the staff is applying towards their review of the WCAP reports.
3. Please send me a list of the NINA/STP personnel and your contractors that you plan on having attend the Chapter 9 draft RAI closed meeting on May 3-4, 2011. I will need their names, company and US citizenship so that I can pre-register them into our system.

That's all for now, thanks,

Rocky D. Foster
