JAN 4 1974

Docket Nos. 50-438
and 50-439

Tennessee Valley Authority
ATTN: Mr. James E. Watson
Manager of Power
818 Power Building
Chattanooga, Tennessee 37401

Gentlemen:

In order that we may continue our review of your application for a license to construct the Bellefonte Nuclear Plant, Units 1 and 2, we are providing Regulatory staff positions regarding pertinent safety matters. These positions are listed in Enclosure No. 1. We request that you state your intent regarding compliance with each of these positions and amend your application accordingly. We are prepared to meet with you to facilitate a complete understanding of these safety matters and the bases for our positions.

We have requested in Enclosure No. 2, additional information needed to clarify and amplify previously submitted information.

In order to maintain our licensing review schedule for those matters dealt with in the enclosures, we will need completely adequate responses by February 14, 1974, to all of these staff positions and requests for information.

Please inform us within 7 days after receipt of this letter of your confirmation of the schedule date or the date you will be able to meet. If you cannot meet our specified date or if your reply is not fully responsive to our request, it is highly likely that the overall schedule for completing the licensing review for the project will have to be extended. Since reassignment of the staff's efforts will require completion of the new assignment prior to returning to this project, the extension will most likely be greater than the delay in your response.

Please contact us if you have any questions regarding the staff positions or the information requested.

Sincerely,

151

A. Schwencer, Chief
Light Water Reactors Branch 2-3
Directorate of Licensing
