

April 26, 2011

COMPANY: BABCOCK & WILCOX COMPANY
DESIGN: MPOWER SMALL MODULAR REACTOR
SUBJECT: SUMMARY OF FEBRUARY 25, 2011, CLOSED MEETING WITH THE
NUCLEAR REGULATORY COMMISSION STAFF AND BABCOCK & WILCOX
COMPANY REGARDING THE PHYSICAL SECURITY DESIGN TECHNICAL
REPORT (TAC NO.RN6095)

On February 25, 2011, staff from the U.S. Nuclear Regulatory Commission (NRC) met with representatives from the Babcock & Wilcox (B&W) Company, at NRC Headquarters in Rockville, MD. The purpose of the meeting was to provide feedback to the NRC staff on the technical report entitled, "Physical Security Design and Program Considerations," (Agencywide Documents Access and Management System (ADAMS) number ML110180233).

B&W provided a description of the physical security design and how they plan to implement new physical security concepts to meet current NRC requirements. The NRC and B&W staff discussed the different sections of the technical report where more information or clarification may be necessary to understand B&W's approach to meet current requirements. In addition, NRC and B&W staff discussed the type of information that is expected in a security program for a design certification application.

The meeting agenda and meeting attendees are included in Enclosures 1 and 2. No slides were provided at this meeting. ADAMS is the system that provides text and image files of NRC's public documents. Documents are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. If you do not have access to ADAMS or have problems accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) staff at 1-800-397-4209, 301-415-4737, or pdr@nrc.gov.
