RE: License Number 20-20633-02, Information Notification Only

On September 7, 2010 Bartlett Holdings, Inc. (BHI) notified the USNRC Region I Office that BHI had purchased a generally licensed instrument "reference standard" utilizing BHI License No. 20-20633-02 as a supporting document. The electroplated check source (Serial No. 7096-10) is a 0.012 uCi (microcurie) quantity of Pu-239 and has been used for performing instrument operability checks at the Savannah River Site (SRS.) All work performed at the site was per 10CFR835 requirements.

The purpose of this memorandum is to notify the USNRC Region I Administrator that on April 6, 2011 Bartlett Holdings, Inc (BHI) transferred the above referenced source to the possession of Savannah River Nuclear Solutions (SRNS,) LLC under the provisions of their source exemption for Contract DE-AC09-08SR22470.

This notification is being provided as an information notice only to the Region 1 Office. If additional information is needed, please feel free to contact Messrs. Chris Messier, RSO or Jerry Hiatt, CHP and Authorized Supervisor of the License via the following methods:

Chris Messier, RSO
508-591-1300
