Dear Mr. Stolz:

In the Matter of the Application of) Docket Nos. 50-438
Tennessee Valley Authority) 50-439

In a letter to E. Adensam dated October 1, 1985, we committed to provide NRC with the Bellefonte Nuclear Plant unit 1 Diesel Generator Design Review/Quality Revalidation (DR/QR) Report by April 1, 1986. As discussed with NRC Project Manager George Kalman on March 28, 1986, we were unable to meet this date. We expect to submit the DR/QR report by March 31, 1988. This revised schedule will permit us to conduct a thorough review of the DR/QR report, complete the recommended calculations, and perform any modifications of unit 1 hardware resulting from the inspection. The unit 1 inspection is complete and the results are on file at the site if NRC would like to review them.

If there are any questions, please get in touch with Amin Kamal at FTS 858-2680.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
