Gentlemen:

In the Matter of the Application of	)	Docket No. 50-438
Tennessee Valley Authority	)	50-439

**BELLEFONTE NUCLEAR PLANT (BLN) - TRANSMITTAL OF TVA POSITION REGARDING CABLE PULLBY (TAC #79281)**

In accordance with TVA's letter to the NRC staff dated December 4, 1990, enclosed for staff review is the TVA position paper regarding cable pullby. A written staff position on the enclosure is requested by July 22, 1991.

In order to minimize cross references between documents, this position paper includes information also contained in the TVA position paper regarding Cable Sidewall Bearing Pressure and Jamming.

As discussed with the NRC staff and management, timely resolution of key issues, such as noted in the enclosure, is important to TVA's consideration of the nuclear option at BLN. Should TVA continue construction of BLN after staff resolution of this and other positions, the agreement reached will be used to govern design, construction, and operations of BLN and will be incorporated into the BLN Final Safety Analysis Report, as appropriate.

Bruce S. Schofield will be contacting the BLN project manager to schedule a working level meeting to assist in the staff's review of this position. A suggested timeframe for this meeting is the week of May 20, 1991.
