**Subject:** Acceptance Review Results for license amendment request to "Revise Shutdown Margin Definition for Stuck Rod Exception." ME5919

**Importance:** High

Dan,

The NRC staff has completed its acceptance review of Florida Power Corporation (the licensee) License Amendment Request (LAR) # 313 Revision 0, dated March 24, 2011, for Crystal River Unit 3 (CR3) (Docket No. 50-302, License No. DPR-72), regarding "Revise Shutdown Margin Definition for Stuck Rod Exception." This LAR, if approved would allow the licensee implement TSTF Traveler 248 for Crystal River 3, revising shutdown margin calculations to credit the insertion of all rods, provided that rods have been verified to be fully inserted by two independent means. The NRC staff finds that the LAR, as transmitted in the licensee's letter dated March 24, 2011 (TAC NO. ME5919), includes sufficient information for the NRC staff to proceed in conducting a detailed technical review.

The acceptance review may result in some questions that will need to be addressed informally or formally prior to the completion of the NRC staff's final assessment of the amendment.

Thanks,

Farideh E. Saba, P.E.
