Subject: RE: Calvert Cliffs 3 Joint Permit (UNCLASSIFIED) - PROPOSED RESPONSE FOR DISCUSSION
Importance: High

1. There will be no enhancement component for stream mitigation.
Specifically, the following information is written in the Mitigation Report:

"It should be noted that all reaches slated for enhancement in the Phase I Mitigation Plan are now proposed for restoration in the Phase II Mitigation Plan." The Mitigation Report also gives a detailed description of the streams proposed for mitigation and how the work proposed would improve the stream channels. A definition of Restoration, Preservation, and Enhancement is also provided in the report and included in the email below.

2. The stream mitigation table identifies 930 linear feet of actual physical stream preservation being implemented for the project. The 465 linear feet represents the "credit" allowed at a ratio of 2:1 for preservation (i.e., half of the actual physical preservation) being allocated administratively by agencies. The proposed change to the Stream Mitigation table is presented below.

Stream Mitigation Credit Summary

Mitigation Type	Mitigation Amount1 (linear feet)	Mitigation Ratio	Mitigation Credit2 (linear feet)
Stream Restoration	10,236	1:1	10,236
Stream Preservation	930	1:2	465
Total	11,166		10,701
Total Impact Length	8,350		8,350
Surplus	2,861		2,351

1. Physical amount implemented on site.
2. Administrative amount allocated by agency for documentation purpose.

Jim,

We also discussed the mitigation appendix and there was a question about the stream mitigation. Please confirm that there would be no enhancement component for stream mitigation. Also, please update the stream mitigation table relative to the confusion about the 465 and the 930 linear feet notations.

The Corps and NRC will be on a conference call tomorrow to finish up the mitigation Appendix, so please provide the information and new table by 10 am tomorrow.

Thank you,

Attached are the marked up Non Tidal figures that were worked annotated in our meeting on 03/30/11. Note that the only changes identified were:

- * Add Corps & MDE (tidal & non tidal) Tracking Numbers to each figure
- * Ensure that each figure is labeled "Non-Tidal" (Note: with your concurrence I will make the label "Non-Tidal Impact Plans" so as to align the this with the mark up of the tidal figure, to be forwarded under separate cover)

I will be forwarding the final figures for your use before noon today.

Regards,
Dimitri Lutchenkov
