Subject: 2011-04-13 Woodlan, CP 2.5.2-1 open issue teleconference

Tarun,

We have checked and we can support a conference call on 5/3/2011. We would like to start the call at 10am EDT (we have personnel from California that will be on the call). Steve Monarque indicated on today's COLA conference call that we would probably have a review status discussion for geology as part of this call. That is also fine with us but we would prefer to discuss the open issue first and then release our SMEs and have the status discussion next. We can use the Luminant licensing bridge (866-857-6769, code 254 897 6886#) for the conference call.

Thanks for arranging this clarifying conference call and for all your efforts to identify and ensure closure of any remaining issues.

Donald R. Woodlan

Subject: CP 2.5.2-1 open item info

Tarun,

The question we asked and the applicant's response related to Open Item 2.5.2-1 is in ML102980032 . On page 25 (Question 02.05.02-26). The applicant re-iterates the question asked and provides its answer in this document. This is the answer that we did not find fully adequate, hence the need for an open item. The issue is that the applicant's own technical experts recommended installing a local seismic network to monitor induced seismicity in the region as described in the Data Report TX-UT-1908-01. The applicants second report prepared after we brought up the issue dismissed the first report and now the applicant decided installing a seismic network is not necessary. We are not quite convinced on that yet.

May 3 will work if the applicant is OK. I heard from my BC (Rebecca Karas). She won't be participating at the teleconference, but I will keep her informed. I think we need to keep this teleconference to informing the applicant that the NRC did not find their response adequate and there is now one open item in 2.5.2 SER.

Dogan
