Subject: Excursion

Ron,

Uranium One is reporting the confirmed Excursion of Monitor well 5MW8. 5mw8 is a perimeter monitor well in Mine Unit 5 a restored wellfield. The excursion was confirmed on April 19, 2011 when a second sample showed two parameters above the Upper Control limit (UCL). Chloride 34.8 mg/l (UCL 23mg/l), Conductivity 1352 mmohs (UCL 1423 mmohs), Alkalinity 314 mg/l (UCL 122.5 mg/l) pH 7.5 and Uranium <0.4 ppm. Corrective action will start within a week. We are now sampling 5MW8 weekly. You will receive my written report in the allotted time frame. Should you have any question regarding this matter please call me.

Larry
Thank You
