COMMISSION VOTING RECORD

DECISION ITEM: SECY-11-0049

TITLE: ADVISORY COMMITTEE ON THE MEDICAL USES OF
ISOTOPES REPORTING STRUCTURE: OPTIONS,
ANALYSIS, AND PROPOSED IMPLEMENTATION PLANS

The Commission (with all Commissioners agreeing) approved the subject paper as recorded in the Staff Requirements Memorandum (SRM) of April 28, 2011.

This Record contains a summary of voting on this matter together with the individual vote sheets, views and comments of the Commission.

A handwritten signature in black ink, appearing to read "Annette Vietti-Cook", written over a horizontal line.

Annette L. Vietti-Cook
Secretary of the Commission

I approve Option 1, the joint recommendation of the NRC staff and the Advisory Committee on the Medical Uses of Isotopes (ACMUI), to retain the current reporting structure. I have also reviewed the new FSME Policy and Procedure 2-5 and believe it will further strengthen the interactions between ACMUI and the staff, while heightening Commission visibility of ACMUI input. I support its implementation and thank the staff for its timely work in response to previous Commission direction. I also support the specific actions put forward by Commissioner Magwood, in his vote, related to the periodic re-evaluation of this issue and the consideration of future budget issues.

COMMENTS: Below X Attached _____ None _____

I approve staff's recommendation to maintain the current structure of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) reporting to the MSSA Director. However, I believe ACMUI and the staff's support program would benefit from adoption of many of the practices of the Advisory Committee on Reactor Safeguards (ACRS). Therefore, MSSA staff should consult with ACRS staff and develop, as appropriate, approaches for enhancing ACMUI's communication with the Commission. For example, ACMUI could formally document its conclusions, recommendations and findings in a letter report to the MSSA Director in FSME, with a copy to the Commission.

**Commissioner Magwood's Comments on
SECY-11-0049, "Advisory Committee on the Medical Uses of Isotopes
Reporting Structure: Options, Analysis, and Proposed Implementation Plans"**

I appreciate the work of the staff and the ACMUI to engage in an open discussion and analysis of the reporting structure for this important advisory committee. The Commission relies very heavily on ACMUI's expertise to inform its consideration of issues associated with the agency's oversight of radioactive materials used in medical applications. It is vital that we assure that ACMUI can fulfill this role in the most efficacious manner.

The analysis reflected in SECY-11-0049 provides a good review of the issues at play and I approve the staff's recommendation. As described by the SECY paper, the staff will continue its work with ACMUI in accordance with FSME Policy and Procedure 2-5 for major medical policy issues, including rulemaking, and staff will provide ACMUI recommendations—along with the staff's evaluation of the recommendations—to the Commission. I believe this approach addressed the concerns reflected in SRM-M100708B.

Further, I fully support ACMUI's intent to reevaluate the structure on a regular basis. If over time, ACMUI finds that changes are required to the structure, staff should notify the Commission. I also understand the ACMUI's concerns regarding the resources it believes are required to support its activities. I encourage the staff to give fully consideration to these concerns. It is appropriate, as staff has indicated, to review the ACMUI's recommendation to increase resources in the context of the FY 2013 budget proposal to the Commission. The results of this review should be provided to the Commission as it considers the agency's FY 2013 budget request.

William D. Magwood, IV 4/18/11
