Subject: Please extend comment period of AP1000

Dear Sirs:

I urge you to extend...indefinitely...the comment period of the AP1000 Design Certification Amendment from its present May 10, 2011 deadline.

The reactor chaos in Japan makes it urgent that no hasty decisions are made about further advancing the AP1000. Please remove the present deadline date, and do not establish another deadline at this time.

Thank you,

Patricia T. Birnie
