

May 16, 2011

APPLICANT: LUMINANT GENERATION COMPANY, LLC.

APPLICATION: UNITED STATES - ADVANCED PRESSURIZED WATER REACTOR
DESIGN CERTIFICATION REVIEW

SUBJECT: SUMMARY OF THE MARCH 30, 2011, PUBLIC MEETING WITH
LUMINANT GENERATION COMPANY, LLC. TO DISCUSS ITS
PROPOSAL TO USE RISK MANAGED TECHNICAL SPECIFICATIONS
AS PART OF THE COMANCHE PEAK NUCLEAR POWER PLANT
COMBINED LICENSE APPLICATION

On March 30, 2011, a Category 1 public meeting was held between the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Luminant Generation Company, LLC. (Luminant), at the office of the NRC, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland. A public meeting notice was issued on March 16, 2011, and was documented in the Agencywide Documents Access and Management System (ADAMS) under accession number ML110670387. The objective of the March 30, 2011, public meeting was for Luminant to present a draft of the Risk Informed Technical Specifications (RITS) Methodology to the NRC staff and to obtain feedback regarding the elements of the RITS methodology. A list of attendees is provided as an enclosure.

The NRC staff provided feedback to Luminant's Technical Specification Methodology of Risk Managed Technical Specifications Surveillance Frequency Control program. Luminant submitted "Comanche Peak Nuclear Power Plant Units 3 and 4 Technical Specification Methodology Risk-Managed Technical Specifications (RMTS) Surveillance Frequency Control Program (SPCP)," Draft 4, dated February 24, 2011, to the NRC staff (ML110900090). Luminant stated that based on the prior week's discussion regarding the NRC staff requirements for, "SECY-10-0121 Modifying the Risk-Informed Regulatory Guidance for New Reactor", dated March 2, 2011. Luminant will revise the draft RITS Methodology submittal to incorporate Large Early Release Frequency, instead of Large Release Frequency, and also to implement the current metrics specified in Regulatory Guide (RG) 1.174 and RG 1.177. Luminant presented a handout during the meeting titled "Luminant Comanche Peak Units 3 and 4 Risk Informed Technical Specifications," dated March 30, 2011. The handout is documented in ADAMS under accession number ML110900089.

The NRC staff recommended Luminant to add risk informed completion times as a part of the glossary. The NRC staff and Luminant discussed the "Tables Top" meetings that will occur between the industry and the NRC staff. Some of the "Table Top" sessions will clear the NRC staff's review of RITS.

- 2 -

At the conclusion of the public meeting, the NRC staff asked if any members of the public had any questions or comments for the NRC staff. The public inquired about the NRC staff's review schedule for the RITS. Other utilities, besides Luminant, were interested in implementing RITS. Please direct any inquiries to me at 301-415-0493, or via e-mail at Tarun.Roy@nrc.gov.
